Politices kandidatexamen (BSc in Politics and Economics), major in Economics *Linköping*

Aalborg University, Aalborg **Aug 22 – Jan 23**
Exchange student *Aalborg*

PROJECTS

Master's thesis (grade A) **Jun 26**
Founder-CEOs and Firm Value: Evidence from Performance, Returns, and Investment Behavior in U.S. Firms

- Built the dataset myself: a Python algorithm scanned SEC filings for 1,578 US-listed firms and flagged 884; every flagged case was checked by hand, confirming 180 founder-CEOs
- Panel regressions on 23,643 firm-years with firm, industry and year fixed effects: founder-led firms had higher valuation (Tobin's Q) and R&D intensity, but no stock return premium

Buyer research for a company sale **Oct 26**
Worked example: finding buyers for a family-owned sheet-metal company

- AI collected buyers and past deals in four parallel tracks; each buyer was screened on its own published criteria and scored in Excel
- 38 buyers considered, 14 cut with written reasons, 6 prioritised and checked by hand

WORK AND PROFESSIONAL EXPERIENCE

SSAB **2021 – 2025**
Factory worker, *Steel Industry / three-shift rotation / summer job* *Oxelösund*

Breviksskolan **Oct 18 – Mar 20**
Substitute teacher, *junior high school* *Oxelösund*

ADDITIONAL

Language: Swedish (native), English (advanced)
Software: Python, SQL, Excel, Stata, R-Studio, Matlab
AI tools: Claude and ChatGPT, used for coding, data collection and analysis in all projects above
Interests: Cooking, Hiking, Golf, Football
