EDUCATION

Handelshögskolan, Göteborg **Aug 24 – Jun 26**
M.Sc in Finance *Gothenburg*

Master's thesis (grade A): *Founder-CEOs and Firm Value: Evidence from Performance, Returns, and Investment Behavior in U.S. Firms*

- Co-authored study of whether founder-led firms differ in valuation, stock returns and investment, based on a panel of 1,578 US-listed firms (23,643 firm-year observations, 2010–2024)
- Built the dataset from Compustat and SEC EDGAR: a Python algorithm scanned proxy statements and annual reports to flag founder-CEOs, and each flagged case was verified by hand
- Estimated panel regressions with firm, industry and year fixed effects; founder-led firms showed higher valuation (Tobin's Q) and R&D intensity, but no stock return premium
